

India Product-Based and Service-Based Companies for Placements

A simple application list for final-year students targeting software, Python, Django, AI/ML, backend, data analyst, and graduate trainee roles.

How to use this PDF: Apply to service companies for higher fresher hiring chances. Apply to product companies too, but prepare coding and SQL strongly. Do not apply only for AI/ML Engineer roles; also apply for Python Developer, Backend Developer, Software Engineer, Data Analyst, and Graduate Engineer Trainee roles.

1. Product-Based Companies - Big MNCs

These companies mainly build their own platforms, tools, cloud products, apps, or software products. Competition is higher, so coding, SQL, projects, and resume quality matter a lot.

Company	Roles to search
Google India	Software Engineer, SWE Intern
Microsoft India	Software Engineer, Support Engineer
Amazon India	SDE, Cloud Support Associate
Adobe India	Software Development Engineer
Oracle India	Associate Software Developer
Salesforce India	Software Engineer, Associate Engineer
SAP Labs India	Developer Associate
IBM India	Associate System Engineer, Software Developer
Intuit India	Software Engineer
Atlassian India	Software Engineer
Cisco India	Software Engineer, Network Engineer
VMware / Broadcom India	Software Engineer
PayPal India	Software Engineer
Uber India	Software Engineer
LinkedIn India	Software Engineer

2. Product-Based Companies - Indian Product / SaaS / Startup Companies

These are very good targets for students with Python, Django, backend, AI tools, or project experience. For Zoho and similar companies, problem-solving and practical coding are important.

Company	Roles to search
Zoho	Software Developer, QA Engineer
Freshworks	Software Engineer, Graduate Trainee
BrowserStack	Software Engineer, QA Automation
Postman	Software Engineer
Chargebee	Software Engineer
Razorpay	Backend Engineer, SDE
Zerodha	Software Engineer
PhonePe	Software Engineer
Flipkart	SDE, Data Analyst
Meesho	Software Engineer, Analyst
Swiggy	SDE, Data Analyst
Zomato	Software Engineer, Analyst
CRED	Backend Engineer
Groww	Software Engineer
Dream11	Software Engineer
InMobi	Software Engineer
HighRadius	Software Engineer, Business Analyst
Druva	Software Engineer
Amagi	Software Engineer

3. Service-Based Companies in India

These companies usually hire more freshers compared to top product companies. For first job, these are important because they give entry-level opportunities through campus drives, off-campus drives, and mass hiring.

Company	Fresher roles to search
TCS	Ninja, Digital, Prime, Graduate Trainee
Infosys	System Engineer, Specialist Programmer
Wipro	Project Engineer
HCLTech	Graduate Engineer Trainee
Tech Mahindra	Associate Software Engineer
Cognizant	Programmer Analyst Trainee
Accenture	Packaged App Development Associate
Capgemini	Analyst, Software Engineer
LTIMindtree	Graduate Engineer Trainee
Mphasis	Trainee Software Engineer
Hexaware	Graduate Engineer Trainee
Persistent Systems	Software Engineer
Coforge	Graduate Engineer Trainee
Birlasoft	Trainee Engineer
Zensar	Junior Software Engineer
Virtusa	Associate Engineer
Deloitte India	Analyst, Technology Consultant
EY GDS	Associate Software Engineer
KPMG India	Analyst
PwC India	Associate Technology Consultant
NTT DATA	Graduate Trainee
DXC Technology	Associate Professional
CGI	Associate Software Engineer
EPAM India	Junior Software Engineer

4. Best Companies for You to Target First

Based on your current profile - AIMA student, Python, Django, AI chatbot, portfolio, GitHub, and web projects - apply in this order:

Priority group	Companies
Easy-to-medium target	TCS, Infosys, Wipro, Cognizant, Accenture, Capgemini, HCLTech, Tech Mahindra, LTIMindtree, Mphasis, Hexaware, Virtusa, Persistent Systems
Product/SaaS target	Zoho, Freshworks, BrowserStack, Chargebee, Postman, HighRadius, Razorpay, Groww, PhonePe, Flipkart, Swiggy, Meesho
Dream companies	Google, Microsoft, Amazon, Adobe, Salesforce, Oracle, SAP Labs, Intuit, Atlassian, Uber

5. Search Keywords for LinkedIn, Naukri, Internshala, Wellfound, and Company Career Pages

- Python Developer Fresher
- Django Developer Fresher
- Software Engineer Fresher
- Graduate Engineer Trainee
- Associate Software Engineer
- Trainee Software Engineer
- Junior Software Developer
- Data Analyst Fresher
- AI ML Intern
- Machine Learning Intern
- Backend Developer Intern
- Software Developer Intern

6. Recommended Role Strategy

Do not apply only for **AI/ML Engineer Fresher**. Those roles are fewer and harder for freshers. Apply mainly for: Python Developer Fresher, Django Developer Fresher, Backend Developer, Software Engineer Fresher, Graduate Engineer Trainee, Data Analyst Fresher, AI/ML Intern, and Machine Learning Intern.

7. Daily Application Target

Apply to at least **10 companies per day**: 6 service-based, 3 product/SaaS, and 1 dream company. Track company name, role, application link, date applied, and status in a sheet. Keep your resume, GitHub, LinkedIn, and portfolio ready before applying heavily.
